SUMMARY

Full Stack Software Developer with 2+ years of experience designing, building, and deploying scalable enterprise applications using C#, .NET Core, Blazor, and SQL. Delivered an AI-powered network monitoring platform that reduced manual validation effort by 70% and was recognized by senior stakeholders. Skilled in REST API development, Generative AI, Large Language Model (LLM) integration, Azure OpenAI, and Agile software development.

SKILLS

Languages: C#, Java, Python, SQL, JavaScript

Frameworks & Libraries: .NET Core, Blazor, AngularJS, REST APIs, Swagger/OpenAPI

AI Technologies: Generative AI, Large Language Models (LLMs), Azure OpenAI, Prompt Engineering, AI-Powered Application Development

Concepts: Object-Oriented Programming, Data Structures & Algorithms, Microservices, Unit Testing, Cloud (Azure)

Tools & Practices: Git, SQL Server, Agile/Scrum, SDLC, CI/CD, Software Architecture Design

EXPERIENCE

Ericsson Global India Ltd

Noida, Uttar Pradesh, India

Software Developer

September 2025 – Present

- Developed scalable full-stack applications using C, .NET Core, Python, Blazor, and SQL. Designed REST APIs, backend services, and database workflows for enterprise applications.
- Implemented Generative AI and Large Language Model (LLM)-based capabilities using Azure OpenAI to build intelligent automation workflows and AI-driven application features.
- Delivered a real-time network monitoring solution reducing manual validation efforts by 70%, improving operational efficiency and enabling faster issue identification.

Associate Software Developer

September 2024 – August 2025

- Developed enterprise web applications using C#, .NET Core, AngularJS, Blazor, Java, and SQL.
- Implemented backend logic, REST APIs, database integrations, and reusable frontend components to support scalable application development.
- Optimized SQL queries and improved application performance through efficient database operations, debugging, and performance optimization.

Graduate Engineer Trainee

December 2023 – August 2024

- Worked on telecom systems and software development processes, contributing to module enhancements, debugging, testing, and Agile software development activities.

PROJECTS

AI-Powered Network Traffic Monitoring & Intelligent Health Analysis Platform | C#, .NET Core, SQL, Azure OpenAI

- Engineered an AI-driven monitoring platform to analyze network performance, detect congestion patterns, and identify anomalies through automated workflows.
- Built an AI chatbot using Azure OpenAI and Large Language Models (LLMs), enabling natural language interactions for device and network-related queries.
- Automated device testing workflows by triggering network checks, collecting performance metrics, and generating actionable insights for faster troubleshooting.

EDUCATION

Kalinga Institute of Industrial Technology

Bhubaneswar, India

Bachelor of Technology in Information Technology

2019 – 2023

ACHIEVEMENTS

Recognized by senior stakeholders for delivering an AI-powered network monitoring solution supporting real-time operational decision making.

Promoted from Graduate Engineer Trainee to Software Developer within 2 years at Ericsson Global India Ltd.
